### Escape Agent

"Escape Agent" consists of a modified suit with an fully integrated life-belt. The trousers and shoes are fixed in a form of compound as known from fire-fighter equipment. The fins, which are fixed at the shoes with hinges, can be fastened with the aluminium bolts hanging at the sleeves.

"Escape Agent" was realized in 2003 and modified in a detail in 2008. Immediately after it, "Warrior" was done.

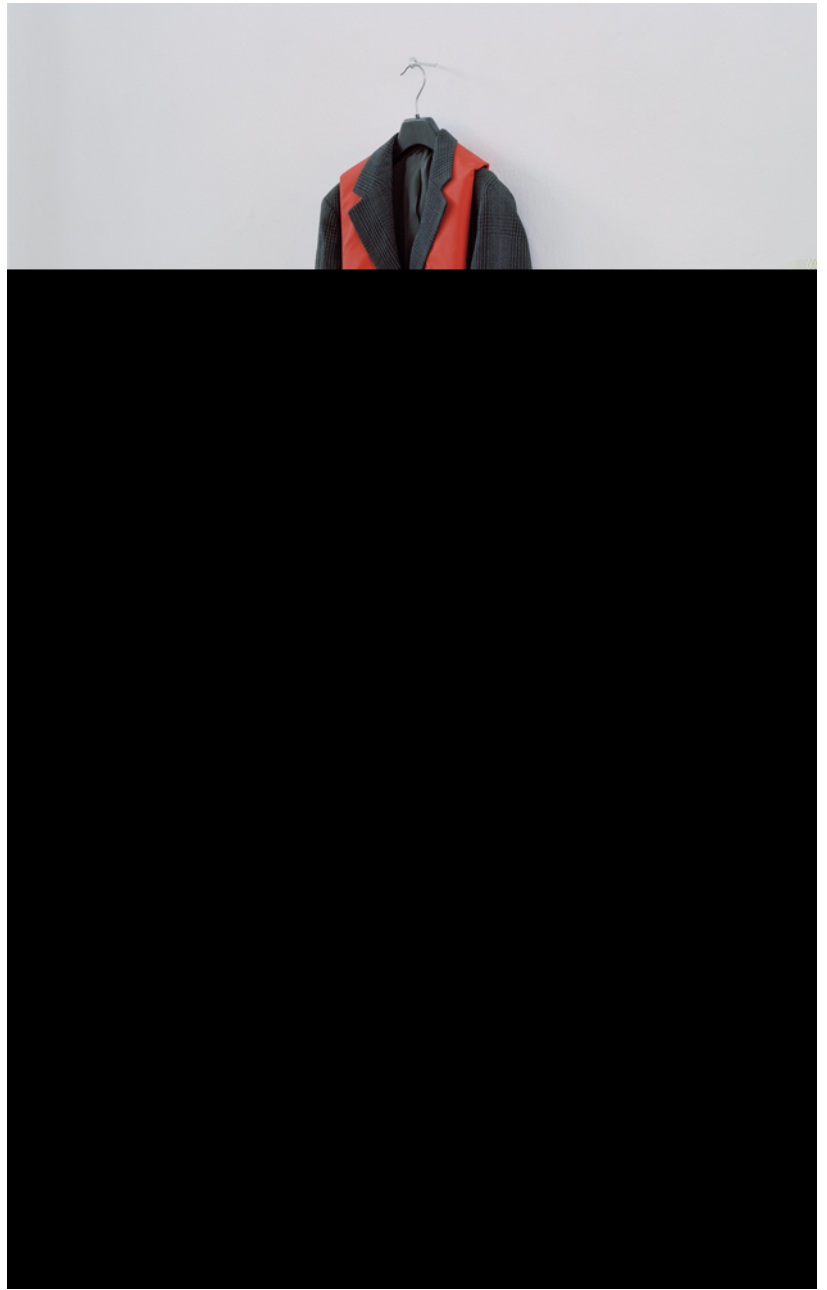

Installation - suit, life-belt, shoes, fins, aluminium, yarn, div. materials, letter

181 x 60 x 40 cm

2003/2008

*Escape Agent - Exhibition kabine extended (Projektraum Alte Feuerwache Berlin)*
